

Skin deep

Designed to make changing time as quick and pain free as possible, the Baby Kingdom range has two innovative products for parents.

Their Talc Free Baby Powder comes with an airless spray pump that forms a protective layer, leaving skin soft and healthy. Cleverly, the state-of-the-art pump releases just enough product to cover the desired area, eliminating waste and mess.

The Nappy Cream is rich in moisture but super light and absorbent. The Vitamin E and Nettle extracts create a natural barrier against moisture and bacteria, with Aloe Vera and Chamomile to soothe and calm baby's delicate skin. Both products contain a wealth of natural ingredients and are dermatologically tested and hypoallergenic.
